

Immediate Listings at the Link Cruncher

Contributed by Urbain Beck
Thursday, 23 October 2008

Get immediate listings at the LinkCruncher -- absolutely free.

Launched in September 2008 to deal with the problem of waiting "forever" for link approvals, the Link Cruncher offers free link submissions with immediate approval. Generally, links do not appear in a directory until they have been reviewed. In an effort to streamline the submission process, links appear right away at the LinkCruncher, and they are reviewed after the fact. To keep the directory clean and family friendly, bad urls are removed regularly (usually at the end of each day).

The owner previously operated a directory based on the PHP Link Directory script and got it up to a page rank of 4 before selling it. From an administrative point of view, the directory was taking way too much time, with hundreds of submissions to review every day. Before long, the directory was over 5000 links behind, creating days and days of reviewing work to be done. The LinkCruncher attempts to solve this administrative problem by approving first, reviewing later. This is a win-win for everyone concerned.

In addition to the free links, the LinkCruncher offers:

- No cost featured links - Get them by reciprocating with a 3rd site
- Deep links are available for a nominal fee

Visit the LinkCruncher and submit your sites today. There are over 600 niche categories to choose from. You can have the directory insert your metatag information, meaning you don't have to type anything. The URL is <http://www.linkcruncher.com>
